Professional Summary

Enthusiastic and dedicated student set to graduate with a BSc Computer Science degree from Newcastle University, backed by 1 year of hands-on experience as a full-stack engineer. Proficient in web development using the Angular framework and Java, and skilled in languages such as Python, C# and JavaScript. Collaborative team player with a passion for delivering high-quality software solutions. Well-versed in a range of technologies and passionate about writing code to create systems that are reliable and user-friendly. Keen to apply the knowledge gained during my degree and placement to real-world scenarios in software engineering.

Employment History
